The Retirement Commission
Wayne County Employees' Retirement System
Detroit, Michigan

Dear Commission Members:

The results of the **Sixty-Fourth Annual Actuarial Valuation** of the assets, actuarial present values and contribution rates needed to fund benefits provided by the Wayne County Employees' Retirement System are presented in this report. The purpose of this valuation was to measure the System's funding progress and to recommend a contribution rate for the fiscal year beginning October 1, 2008.

The date of the valuation was September 30, 2007.

In this report, separate contribution rates are calculated for the County General Fund and for the Airport Authority.

Valuation results and comments are presented in Section A.

The valuation was based upon information, furnished by your Executive Secretary and staff concerning Retirement System benefits, financial assets and transactions, individual members, terminated members, retired members and beneficiaries. Data was checked for year-to-year consistency, but was not otherwise audited. This information is summarized in Section B.

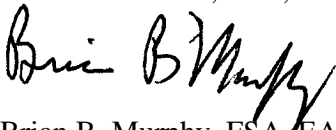

To the best of our knowledge, this report is complete and accurate and was made in accordance with standards of practice prescribed by the Actuarial Standards Board and in compliance with the Retirement System Ordinance. The actuarial assumptions used for the valuation were adopted by the Retirement Commission pursuant to the 5-year experience study for the period October 1, 1999 through September 30, 2004, and produce results which, in the aggregate, appear to be reasonable.

The actuaries submitting this report are Members of the American Academy of Actuaries (M.A.A.A.) as indicated, and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

Respectfully submitted,

Norman L. Jones, FSA, EA, MAAA

Brian B. Murphy, FSA, EA, MAAA

Judith A. Kermans, EA, MAAA

NLJ/JAK/BBM/bd

SECTION A

VALUATION RESULTS AND COMMENTS

FUNDING OBJECTIVE

The funding objective for the Retirement System is to establish and receive percent of payroll contributions which, when invested at the assumed rate of return, will accumulate assets over each member's working years that will be sufficient to pay expected retirement benefits.

CONTRIBUTION RATES

The Retirement System is supported by member contributions, employer contributions and investment income on Retirement System assets. Members contribute percentages of their pay (by Ordinance and/or collective bargaining agreement) and the employer contributes the actuarially determined remainder needed to meet the funding objective.

Contributions are determined by the actuarial valuation and are sufficient to:

- (1) cover the actuarial costs allocated to the current year by the actuarial cost method (the normal cost); and
- (2) finance over a period of future years the actuarial costs not covered by present assets and anticipated future normal costs (unfunded actuarial accrued liability).

Contribution requirements for the fiscal year beginning October 1, 2008 are shown on page A-2.

**CONTRIBUTIONS TO FINANCE DEFINED BENEFIT PLANS
OF THE RETIREMENT SYSTEM
FOR THE FISCAL YEAR BEGINNING OCTOBER 1**

Defined Benefit Plans - Contributions for	2008		2007 All WCERS
	General Fund	Airport	
Normal Cost			
Service allowances	8.55 %	5.12 %	6.33 %
Disability allowances	1.40 %	0.70 %	1.05 %
Survivor allowances	0.57 %	0.44 %	0.40 %
Termination benefits			
Deferred service allowances	0.53 %	0.34 %	0.48 %
Refunds of member contributions	0.14 %	0.03 %	0.11 %
Total Normal Cost	11.19 %	6.63 %	8.37 %
Less Portion Paid by Members*	1.26 %	0.23 %	0.77 %
County Defined Benefit Normal Cost	9.93 %	6.40 %	7.60 %
Unfunded Actuarial Accrued Liability#	13.74 %	7.08 %	8.22 %
Total Computed Employer Rate	23.67 %	13.48 %	15.82 %

* Weighted average of the various contribution rates.

Amortized as a level percent of pay over an open period of 20 years.

Historical contribution rates for prior fiscal years are shown on page A-3. The total computed employer contribution rates shown on this page are meant to be applied to Plan 1, 2, 3 and 5 payroll to determine dollar contributions from the General Fund and the Airport into the Retirement System.

Beginning with the September 30, 2007 valuation, separate contribution rates were calculated for the General Fund and Airport Authority.

* Benefit changes are reflected in this valuation.

After assumption changes.

@ Adjustment made to funding value of assets.

+ Valuations before 1998 were based on a fiscal year ending November 30.

Beginning with the September 30, 2007 valuation, separate contribution rates were calculated for General Fund and Airport of the WCERS. The results above are displayed as follows:

- a) Base benefits valued for asset allocation
- b) Includes benefit changes, prior to Plan 4 to Plan 5 member transfers
- c) Includes benefit changes and Plan 4 to Plan 5 member transfers

Note: Hybrid Plan 5 exists September 30, 2003 and later.

FUNDING PROGRESS INDICATORS

The funding progress and status of the defined benefit plans is measured by the following indicators:

- ***The ratio of the funding value of assets to accrued liabilities.*** The ratio is expected to hold steady or gradually move toward 100% in the absence of benefit changes, assumption changes or valuation method changes.
- ***The ratio of the unfunded actuarial accrued liability to member payroll.*** In a soundly financed retirement system, the amount of the unfunded actuarial accrued liabilities will be controlled and prevented from increasing in the absence of benefit improvements. The ratio is a relative indicator of the condition in an inflationary environment.

Valuation Date September 30##	Accrued Liability	Funding Value of Assets(1)	Funded Ratio	Member Payroll +	Unfunded Actuarial Accrued Liability	
					Dollars	% of Payroll
(\$ in thousands)						
General Fund						
2007*	\$1,090,515	\$891,423	82%	\$276,681	\$199,092	72 %

* Benefit changes are reflected in this valuation.

After changes in assumptions.

+ Includes defined contribution Plan 4 payroll.

(1) Reserve for inflation equity not included in this schedule.

@ After one time adjustment of funding value of assets.

Valuations before 1998 were based on a fiscal year ending November 30.

Note: Hybrid Plan 5 exists September 30, 2003 and later.

COMMENTS ON THE ACTUARIAL VALUATION

1. **Experience:** The Market Value rate of return during fiscal year 2007 was 14.6%, which exceeds the assumed rate of 8.0%. Under the asset valuation method, gains and losses are spread over a 4-year period. The net result of this year's Market Value gain, and carryover gains and losses from prior years, is a net gain of \$33.9 million. As of September 30, 2007, the Market Value of assets exceeds the Funding Value by \$70.6 million. This would normally imply that contribution rate decreases would occur next year. However, given the current economic environment, an increase in the contribution rate is much more likely to occur.
2. **Status:** Computed actuarial accrued liabilities exceed the Funding Value of assets by \$199.1 million for the General Fund and \$22.6 million for the Airport. Unfunded actuarial accrued liabilities are currently being amortized over an open 20-year period in accordance with Retirement Commission policy. The open 20-year amortization period was first adopted for the September 30, 2004 valuation. The General Fund of the Wayne County Employees' Retirement System (WCERS) is 82% funded, and the Airport is 71% funded.
3. **Contribution Rates:** Beginning with the September 30, 2007 valuation, contribution rates are calculated separately for the County General Fund and the Airport Authority. The calculated contribution rates are 23.67% for the General Fund and 13.48% for the Airport Authority. These rates were calculated by allocating total system assets between the Airport and General Fund. The method used for the allocation was agreed upon by County staff and Airport Authority staff and is outlined in our letter dated May 7, 2008. As agreed, the allocation was based on benefits as of September 30, 2006 (prior to negotiated benefits for certain General Fund groups). The calculated contribution rates necessarily differ from each other due to:
 - a. *The demographics of each group.* As of September 30, 2007, approximately 20% of General Fund members were in Plan 1 and Plan 3, compared to only 5% for Airport members. Plan 1 and Plan 3 have higher benefit multipliers than the other Plans.
 - b. *Benefit changes for General Fund members.* Plan 3 Sheriffs received an increase in the Plan 3 benefit multipliers (2.0% for the first 20 years of service, 2.5% for years 20-25, and 3.0% thereafter). For a member with 30 years of service, this represents an increase of close to 30% in pension benefits over the prior benefit structure. Also, Plan 5 Sheriffs received an increased Plan 5 benefit multiplier (2.0% for all years of service). For a member with 30 years of service, this represents an increase of 50% in pension benefits over the prior benefit structure. Finally, there were various Early Retirement Incentives (ERIs) reflected in this valuation. The impact of the ERIs could not be separately isolated but was included in the total results.
4. **Benefit Changes:** We are aware that contract settlements are in process for active members that include changes in benefit multipliers, enhancement of the Average Final Compensation and Early Retirement Incentives. The benefit changes reflected in the contracts, if adopted, will also act to increase the contribution rate for the September 30, 2008 valuation. Also, it is our understanding that recent contract negotiations will provide for the creation of a new "Plan 6". Although we do not have full information on the changes, based on our understanding, they will act to increase the contribution rate for the September 30, 2008 valuation.
5. **Recommendations:** Given the recent market performance and the substantial changes in plan provisions that are expected before the next valuation, the Board may wish to have an updated estimate or projection before next year's valuation. Once the benefit changes have been evaluated, we could provide such an estimate based on updated financial information. If the Board would be interested in such a study, please let us know. Finally, with the General Fund and the Airport now making separate contributions, the WCERS may no longer be considered a cost sharing plan. We recommend that your auditor review the status of the plan and the reporting requirements.

ACTUARIAL BALANCE SHEET - SEPTEMBER 30, 2007

Present Resources and Expected Future Resources

A. Valuation assets	
1. Net assets from system financial statements (market value)	\$ 1,037,978,404

SECTION B

SUMMARY OF BENEFIT PROVISIONS AND VALUATION DATA

BRIEF SUMMARY OF BENEFIT PROVISIONS
DEFINED BENEFIT PLAN 1
(SEPTEMBER 30, 2007)

Availability

Defined Benefit Plan 1 was closed to new hires on August 15, 1983
(or on the date in a negotiated agreement).

Normal Retirement (no reduction factor for age):

Eligibility - Sheriff: 25 years of service.

Others: Age 50 with 25 years of service, age 60 with 5 years of service or any age with 30 years of service.

Pension Amount – Total service times 2.65% of average final compensation.

Maximum pension is 75% of AFC (less worker's compensation payments). Minimum monthly pension is \$5 times years of service.

Average Final Compensation (AFC) - Monthly average of covered compensations for best 4 years of credited service. Some lump sums, overtime & premium pay are included.

Vested Termination (deferred retirement):

Eligibility - 8 years of service. Pension begins at age 60.

Pension Amount - Computed as normal retirement but based upon service and AFC at time of termination.

Duty Disability Retirement:

Eligibility - No age or service requirements.

Pension Amount - Computed as normal retirement with additional service credit granted from date of retirement to age 60. Minimum pension is \$4,800 annually. Maximum pension is the lesser of 75% of AFC, and 100% of AFC less outside earnings and social security disability benefits. Worker's compensation payments offset the maximum.

Non-Duty Disability Retirement:

Eligibility - 10 years of service.

Pension Amount - Computed as normal retirement but based on service and AFC at time of retirement.

BRIEF SUMMARY OF BENEFIT PROVISIONS
DEFINED BENEFIT PLAN 1
(SEPTEMBER 30, 2007)

Duty Death Before Retirement:

Eligibility - No age or service requirements.

Pension Amount - Pension to the spouse is computed as a normal retirement but actuarially reduced in accordance with a 100% joint and survivor election. Additional service credit is granted from date of death to date the deceased member would have attained 60 years of age. If there is no eligible spouse, unmarried children under age 18 receive equal shares of 50% of normal retirement pension. Spouse's pension shall not be less than \$4,800. Worker's compensation payments and social security offset the maximum.

Non-Duty Death Before Retirement:

Eligibility - 10 years of service.

Pension Amount - Pension to the spouse is computed as a normal retirement but actuarially reduced in accordance with a 100% joint and survivor election. If there is no eligible spouse, unmarried children under age 18 receive equal shares of 50% of normal retirement pension.

Post-Retirement Cost-of-Living Adjustment:

Eligible for distributions from Reserve for Inflation Equity.

Member Contributions:

Sheriff Command Officers and Deputies: 5.00% of annual compensation.

Others:

Credited Service	Contribution Rate*
0 yrs. thru 8 yrs.	6.00% or 6.58% of compensation
9 yrs. thru 12 yrs.	4.00% or 4.58% of compensation
13 yrs. thru 16 yrs.	3.00% or 3.58% of compensation
17 yrs. or more	2.00% or 2.58% of compensation

* Contribution rate is determined by coverage group from collective bargaining agreement (CBA).

BRIEF SUMMARY OF BENEFIT PROVISIONS
DEFINED BENEFIT PLAN 2
(SEPTEMBER 30, 2007)

Availability - Defined Benefit Plan 2 was available to persons hired after August 15, 1983 and to DBP 1 and DBP 3 members who elect to be covered by DBP 2. **Eligibility to enter this Plan ceased as of October 1, 2001.**

Normal Retirement (no reduction factor for age):

Eligibility - Age 55 with 25 years of service or age 60 with 15 or 20 years of service; or, age 65 with 8 years of service.

Pension Amount - Average final compensation multiplied by the sum of a) 1% of credited service up to 20 years; and, b) 1.25% of credited service over 20 years. Maximum County financed portion is 75% of AFC.

Average Final Compensation (AFC) - Monthly average of covered compensation for the best 5 years of credited service. Covered compensation includes overtime, premium and holiday pay, but not lump sums.

Vested Termination (deferred retirement):

Eligibility - 8 years of service. Pension begins at age 65.

Pension Amount - Computed as normal retirement based on service and AFC at time of termination.

Duty Disability Retirement:

Eligibility - No age or service requirements.

Pension Amount - Computed as normal retirement with additional service credit granted from date of retirement to age 60. Maximum pension is the lesser of 75% of AFC, and 100% of AFC less outside earnings and social security disability benefits. Worker's compensation payments, social security benefit payments, and outside earnings offset the maximum. Minimum pension for select unions is 75% of AFC.

Non-Duty Disability Retirement:

Eligibility - 10 years of service.

Pension Amount - Computed as normal retirement but based on service and AFC at time of termination. Social security benefit payments and outside earnings offset the maximum.

Death Before Retirement:

Eligibility - 10 years of service; or age 65 and 8 years of service (any amount of service if Duty related).

Pension Amount - Pension to the spouse is computed as a normal retirement but actuarially reduced in accordance with a 100% joint and survivor election. If there is no eligible spouse, unmarried children under 18 receive equal shares of 50% of normal retirement pension.

Post-Retirement Cost-of-Living Adjustment:

Eligible for distributions from the Reserve for Inflation Equity.

Member Contributions:

None.

BRIEF SUMMARY OF BENEFIT PROVISIONS
DEFINED BENEFIT PLAN 3
(SEPTEMBER 30, 2007)

Availability - Plan 3 was available to persons last hired after August 15, 1983; and, to other persons if offered by collective bargaining agreement. **Eligibility to enter this Plan ceased as of March 31, 1986.**

Normal Retirement (no reduction factor for age):

Eligibility - Age 55 with 25 years of service; or age 60 with 15 or 20 years of service; or age 65 with 5 years of service. Sheriff Command Officers may retire with 25 years of service regardless of age.

Pension Amount – Average final compensation multiplied by the sum of:

For select negotiated CBAs (Sheriffs): 2.0% of credited service up to 20 years; and b) 2.5% of credited service between 20 and 25 years; and, c) 3.0% of credited service over 25 years.

Others: a) 1.5% of credited service up to 20 years; and b) 2.0% of credited service between 20 and 25 years; and, c) 2.5% of credited service over 25 years.

Maximum County financed portion is 75% of AFC.

Average Final Compensation (AFC) – Monthly average of covered compensation for the best 5 years of credited service.

For select negotiated CBAs (Sheriffs): Covered compensation includes overtime, premium and holiday pay, 75% of accumulated sick leave and 100% of accumulated vacation time.

Others: Covered compensation includes overtime, premium and holiday pay, up to 320 hours of lump sum payments for unused sick leave and up to 120 hours of lump sum payments for unused vacation time.

Vested Termination (deferred retirement):

Eligibility - 8 years of service. Pension begins at age 65.

Pension Amount - Computed as normal retirement but based upon service and AFC at time of termination.

Duty Disability Retirement:

Select Unions (Sheriff Command Officers) receive 75% of AFC. Worker's compensation, social security benefit payments, and outside earnings may offset pension.

Others: covered outside of Retirement System.

Non-Duty Disability Retirement:

Covered outside of Retirement System.

Death Before Retirement:

Eligibility - 10 years of service; or, age 65 with 5 years of service (any amount of service if Duty related).

Pension Amount - Pension to the spouse is computed as a normal retirement but actuarially reduced in accordance with a 100% joint and survivor election. If there is no eligible spouse, unmarried children under age 18 receive equal shares of 50% of normal retirement pension.

Post-Retirement Cost-of-Living Adjustment:

Eligible for distributions from the Reserve for Inflation Equity.

Member Contributions:

3% of covered compensation.

BRIEF SUMMARY OF BENEFIT PROVISIONS
DEFINED CONTRIBUTION PLAN 4
(SEPTEMBER 30, 2007)

Defined Contribution Plan 4 is not included in this valuation with the exception of the following provision covered under the Defined Benefit Plans:

Duty Disability Retirement:

Eligibility – No age or service requirements.

The Duty Disability benefit is partially funded by the member's account balance. For select negotiated CBAs (Sheriffs), benefit is equal to 75% of the employee's average final compensation as otherwise provided in Defined Benefit Plan 1. The employee is required to surrender all funds in Defined Contribution Plan 4 and pay any outstanding loans.

Members in Plan 4 are eligible to roll account balances into Defined Benefit Plan 5 to receive a defined benefit during periods as specified in CBAs. This benefit would be based on the amount of service that can be purchased by the member's account balance.

BRIEF SUMMARY OF BENEFIT PROVISIONS
HYBRID PLAN 5
(SEPTEMBER 30, 2007)

Availability - Hybrid Plan 5 is obligatory for persons hired after October 1, 2001. Exempt employees may choose between Plan 5 and DC Plan 4. Members may transfer from Plan 4 into this Plan.

DEFINED BENEFIT PROVISIONS

Normal Retirement (no reduction for age):

Eligibility - Age 55 with 25 years of service; or age 60 with 20 years of service; or age 65 with 8 years of service; or 30 years of service regardless of age.

Pension Amount –

For select negotiated CBAs (Sheriffs) – Average final compensation multiplied by 2.0% for all years of credited service. Maximum pension is 75% of AFC (less worker's compensation payments).

Others – Average final compensation multiplied by the sum of a) 1.25% of credited service up to 20 years; and b) 1.5% of credited service over 20 years. Maximum pension is 75% of AFC (less worker's compensation payments).

Average Final Compensation (AFC) - Monthly average of covered compensation for the last 5 years of credited service, with the exception of Sheriff Command Officers where AFC is for the best 5 years of credited service. Covered compensation includes overtime and premium pay, and also includes payout of sick and annual leave banks for select negotiated CBAs.

Vested Termination (deferred retirement):

Eligibility - 8 years of service. Pension begins at age 65.

Pension Amount - Computed as normal retirement but based upon service and AFC at time of termination.

Duty Disability Retirement:

Eligibility - No age or service requirements.

Pension Amount - Computed as normal retirement with additional service credit granted from date of retirement to age 60. Worker's compensation payments, Social Security benefit payments and outside earnings offset the defined benefit portion of the pension. For select negotiated CBAs (Sheriffs), the benefit is equal to 75% of AFC as otherwise provided in Defined Benefit Plan 1. The employee is required to surrender all Defined Contribution funds in Hybrid Plan 5 and pay any outstanding loans.

Non-Duty Disability Retirement:

Eligibility - 10 years of service.

Pension Amount - Computed as normal retirement but based on service and AFC at time of termination. Social security benefit payments and outside earnings offset the maximum.

BRIEF SUMMARY OF BENEFIT PROVISIONS
HYBRID PLAN 5
(SEPTEMBER 30, 2007)

Duty Death Before Retirement:

Eligibility - No age or service requirements.

Pension Amount - Pension to the spouse is computed as a normal retirement but actuarially reduced in accordance with a 100% joint and survivor election. Additional service credit is granted from date of death to date the deceased member would have attained 60 years of age. If there is no eligible spouse, unmarried children under age 18 receive equal shares of 50% of normal retirement pension. Worker's compensation payments offset the maximum.

Non-Duty Death Before Retirement:

Eligibility - 10 years of service.

Pension Amount - Pension to the spouse is computed as a normal retirement but actuarially reduced in accordance with a 100% joint and survivor election. If there is no eligible spouse, unmarried children under age 18 receive equal shares of 50% of normal retirement pension.

Post-Retirement Cost-of-Living Adjustment:

Eligible for distributions from the Reserve for Inflation Equity.

Member Contributions:

1.0% General Fund, 0% Airport.

DEFINED CONTRIBUTION PROVISIONS

Contributions:

6% of base compensation (3% member plus 3% employer). Contributions are invested by the members based on investment options established by the Retirement Commission. Contribution balances are credited with actual net market rates of return of the selected investments.

Vesting:

Member portion – 100% immediately.

Employer portion – 50% after 1 year of total service.

75% after 2 years of total service.

100% after 3 years of total service.

Distribution Options:

Terminating members may choose between:

- Lump sum distribution of vested account balance, or
- Rollover of vested account balance to a qualified plan, or
- Annuitized vested account balance if the member is also eligible for a defined benefit pension.

DEVELOPMENT OF FUNDING VALUE OF RETIREMENT SYSTEM ASSETS

Year Ended September 30:	2005	2006	2007	2008	2009	2010
A. Funding Value Beginning of Year	\$975,542,640	\$945,747,768	\$948,313,645			
B. Market Value End of Year	991,448,564	987,415,361	1,037,978,404			
C. Market Value Beginning of Year	956,006,814	991,448,564	987,415,361			
D. Non-Investment Net Cash Flow	(96,018,660)	(90,619,780)	(87,186,213)			
E. Investment Income						
E1. Market Total: B - C - D	131,460,410	86,586,577	137,749,256			
E2. Amount for Immediate Recognition	74,202,665	72,035,030	72,377,643			
E3. Amount for Phased-In Recognition: E1 -E2	57,257,745	14,551,547	65,371,613			
F. Phased-In Recognition of Investment Income						
F1. Current Year: 0.25 x E3	14,314,436	3,637,887	16,342,903			
F2. First Prior Years	(440,816)	14,314,436	3,637,887	\$16,342,903		
F3. Second Prior Years	3,639,120	(440,816)	14,314,436	3,637,887	\$16,342,903	
F4. Third Prior Years	(25,491,617)	3,639,120	(440,816)	14,314,436	3,637,887	\$16,342,903
F5. Total Recognized Investment Gain	(7,978,877)	21,150,627	33,854,410	34,295,226	19,980,790	16,342,903
G. Funding Value End of Year: A + D + E2 + F5	\$945,747,768	\$ 948,313,645	\$967,359,485			
H. Difference between Market & Funding Value	45,700,796	39,101,716	70,618,919	36,323,693	16,342,903	0
I. Recognized Rate of Return	7.1%	10.3%	11.7%			
J. Market Value Rate of Return	14.5%	9.2%	14.6%			
K. Ratio of Funding Value to Market Value	95.4%	96.0%	93.2%			

The Funding Value of Assets recognizes assumed investment income (line E2) fully each year. Differences between actual and assumed investment income (line E3) are phased in over a closed 4-year period. During periods when investment performance exceeds the assumed rate, Funding Value of Assets will tend to be less than Market Value. During periods when investment performance is less than the assumed rate, Funding Value of Assets will tend to be greater than Market Value. The Funding Value of Assets is *unbiased* with respect to Market Value. At any time it may be either greater or less than Market Value. If assumed rates are exactly realized for 3 consecutive years, it will become equal to Market Value.

DERIVATION OF RESERVE FOR INFLATION EQUITY FUND (IEF)

	September 30, 2007	September 30, 2006
Rate of investment return		
(1) Actual return on funding value of assets	11.74 %	10.35 %

Vested former members included in the valuation totaled 139. A vested former member is a person who has left the employ of the County after acquiring credited service sufficient for a vested pension and has not withdrawn their accumulated member contributions from the Reserve for Accumulated Member Contributions. A vested former member may retire upon satisfying the conditions for normal retirement.

Former members who were transferred to State employment during 1981 and are eligible for deferred retirement, and former members who transferred to the State and have since terminated are included in the schedule above.

SECTION C

METHODS AND ASSUMPTIONS

BASIC FINANCIAL PRINCIPLES AND OPERATION OF THE RETIREMENT SYSTEM

Benefit Promises Made Which Must Be Paid For. A retirement program is an orderly means of handing out, keeping track of, and financing pension promises to a group of employees. As each member of the retirement program acquires a unit of service credit the member is, in effect, handed an "IOU" which reads: "The Retirement System promises to pay you one unit of retirement benefits, payments in cash commencing when you retire."

The principal related financial question is: When shall the money required to cover the "IOU" be contributed? This year, when the benefit of the member's service is received? Or, some future year when the "IOU" becomes a cash demand?

The Constitution of the State of Michigan is directed to the question:

"Financial benefits arising on account of service rendered in each fiscal year shall be funded during that year and such funding shall not be used for financing unfunded accrued liabilities."

This Retirement System meets this requirement by having as its financial objective the establishment and receipt of contributions, expressed as percents of active member payroll, which will remain approximately level from year to year and will not have to be increased for future generations of taxpayers.

Translated into actuarial terminology, a level percent-of-payroll contribution objective means that the contribution rate must be at least:

Normal Cost (the present value of future benefits assigned to members' service being rendered in the current year)

. . . plus . . .

Interest on the Unfunded Actuarial Accrued Liability (the difference between the actuarial accrued liability and current system assets).

The accumulation of invested assets is a by-product of level percent of payroll contributions, not the objective. Investment income becomes the third major contributor to the retirement program, and the amount is directly reacted to the amount of contributions and investment performance.

If contributions to the retirement program are less than the preceding amount, the difference, plus investment earnings not realized thereon, will have to be contributed at some later time, or, benefits will have to be reduced, to satisfy the fundamental fiscal equation under which all retirement programs must operate:

$$\mathbf{B} = \mathbf{C} + \mathbf{I} - \mathbf{E}$$

The aggregate amount of **B**enefit payments to any group of members and their beneficiaries cannot exceed the sum of:

The aggregate amount of **C**ontributions received on behalf of the group

. . . plus . . .

Investment earnings on contributions received and not required for immediate cash payments of benefits

. . . minus . . .

The **E**xpenses of operating the program.

Computed Contribution Rate Needed To Finance Benefits. From a given schedule of benefits and from the data furnished, the actuary calculates the contribution rate *by means of an actuarial valuation* - the technique of assigning monetary values to the risks assumed in operating a retirement program.

CASH BENEFITS LINE. This relentlessly increasing line is the fundamental reality of retirement plan financing. It happens each time a new benefit is added for future retirements (and happens regardless of the design for contributing for benefits).

LEVEL CONTRIBUTION LINE. Determining the level contribution line requires detailed assumptions concerning a variety of experiences in future decades, including:

Economic Risk Areas

- Rates of investment return
- Rates of pay increase
- Changes in active member group size

Non-Economic Risk Areas

- Ages at actual retirement
- Rates of mortality
- Rates of withdrawal of active members (turnover)
- Rates of disability

A CLOSED PENSION PLAN

A plan becomes closed when no new hires are admitted to active membership. The persons covered by the plan at the time of closing continue their normal activities and continue to be covered by the plan, until the last survivor dies.

CASH BENEFITS LINE. After a pension plan becomes closed, the usual pattern is for cash benefits to continue to increase for decades of time. Eventually the cash benefits will peak, and then gradually decrease over more decades of time, ultimately to zero. The last cash benefit is likely to occur a century after the time the plan is closed.

The precise amounts of cash benefits cannot be known now, and must be estimated by assumptions of future experiences in a variety of financial risk areas.

THE ACTUARIAL VALUATION PROCESS

The financing diagram on page C-3 shows the relationship between the two fundamentally different philosophies of paying for retirement benefits: the method where contributions match cash benefit payments (or barely exceed cash benefit payments, as in the Federal Social Security program) which is an *increasing contribution method*; and the *level contribution method* which equalizes contributions between the generations.

The actuarial valuation is the mathematical process by which the level contribution rate is determined, and the flow of activity constituting the valuation may be summarized as follows:

- A. **Census Data**, furnished by plan administrator.
 - Retired lives now receiving benefits
 - Former employees with vested benefits not yet payable
 - Active employees

- B. + **Asset data** (cash & investments), furnished by plan administrator

- C. + **Assumptions concerning future experience in various risk areas**, which assumptions are established by the Retirement System after consulting with the actuary

- D. + **The funding method** (the long-term, planned pattern for employer contributions)

- E. + **Mathematically combining the assumptions, the funding method, and the data**

- F. = Determination of:
 - Plan financial position; and/or
 - New Employer Contribution Rate

ACTUARIAL COST METHODS

Normal cost and the allocation of benefit values between service rendered before and after the valuation date was determined using the *individual entry-age actuarial cost method* having the following characteristics:

- the annual normal costs for each individual active member, payable from the date of employment to the date of retirement, are sufficient to accumulate the value of the member's benefit at the time of retirement;
- each annual normal cost is a constant percentage of the member's year-by-year projected covered pay.

Asset Valuation Method. Last year's valuation assets are increased by contributions and reduced by refunds, benefit payments and expenses. An amount equal to the assumed investment return for the year is then added. Differences between actual return on a market value basis and an assumed return are phased in over a four-year period.

The portion of the actuarial present value allocated to the valuation year is called the normal cost. The portion of the actuarial present value not provided for by the actuarial present value of future normal costs is called the actuarial accrued liability. Deducting accrued assets from the actuarial accrued liability determines the unfunded actuarial accrued liability.

The base rate of increase in salaries used to calculate the actuarial liability was assumed to be 4.0%.

ACTUARIAL ASSUMPTIONS USED FOR THE VALUATION

Contribution requirements and actuarial present values are calculated by applying estimates of future experience (actuarial assumptions) to the benefit provisions and participant data of the System, using the actuarial cost methods described on page C-6.

The principal areas of activity which require experience estimates are:

- long-term rates of investment return to be generated by the assets of the System
- patterns of pay increases to members
- rates of mortality among members, retired members and beneficiaries
- rates of withdrawal of active members
- rates of disability among active members
- the age patterns of actual retirements

In an actuarial valuation, the monetary effect of each activity is calculated for as long as a present covered person survives - - - a period of time which can be as long as a century.

Actual experience of the System will not coincide exactly with the experience estimates. Each valuation provides a complete recalculation of estimated future experience and takes into account all past differences between estimated and actual experience. The result is a continual series of adjustments (usually small) to the computed contribution rate.

From time to time one or more of the estimates are modified to reflect experience trends but not random or temporary year-to-year fluctuations.

ACTUARIAL ASSUMPTIONS USED FOR THE VALUATION

Investment Return (net of administrative expenses).

8.0% per year, compounded annually. This rate consists of a real rate of return of **4.0%** a year plus a long-term rate of wage inflation of **4.0%** a year.

No specific Price Inflation assumption is made for this valuation. However, the above assumptions would be consistent with a price inflation assumption in the 3% area.

This assumption is used to equate the value of payments due at different points in time and was first used for the September 30, 1998 valuation. Approximate rates of investment return, for the purpose of comparisons with assumed rates, are shown below.

	Year Ended September 30					5-Year Average
	2007	2006	2005	2004	2003	
Recognized Rate of Return	11.7%	10.3%	7.1%	(0.2)%	3.0%	6.3%

The nominal rate of return was computed using the approximate formula $i = I$ divided by $1/2 (A + B - I)$, where I is recognized investment income net of expenses, A is the beginning of year asset value, and B is the end of year asset value.

Rates of salary increase were as follows:

Merit and Longevity Pay Increases			
Other		Sheriffs	
Age	Increase	Service	Increase
20	3.70%	5	4.22%
25	3.40%	10	3.38%
30	2.50%	15	2.54%
35	1.90%	20	2.18%
40	1.60%	25	2.04%
45	1.20%	30	1.76%
50	1.00%	35	1.06%
55	0.80%	40	0.64%
60	0.50%	60	0.60%
65 & Over	0.00%	61 & Over	0.00%
Ref:	107	Ref:	110

These rates are used to project current salaries to those upon which pension amounts are likely to be based. The current rates were first used for the September 30, 2004 actuarial valuation.

Rates of separation from active membership were as follows:

% of Active Members Separating Within the Next Year							
Other				Sheriffs			
Ages		Service (Plan 5 only)		Ages		Service (Plan 5 only)	
20	6.00%	0 - 1	20%	20	4.70%	0 - 1	15%
21	6.00%	1 - 2	15%	21	4.70%	1 - 2	13%
22	6.00%	2 - 3	12%	22	4.70%	2 - 3	10%

Ref:	560	560	92	369	Ref:	556	957	957

The rates were first used for the September 30, 2004 valuation.

Rates of disability are represented by the following table:

Sample Ages	Percent Becoming Disabled Within Next Year		
	Non-Sheriffs (Plan 1 only)		Others
20	0.08%		0.10%
25	0.08%		0.10%
30	0.08%		0.07%
35	0.08%		0.12%
40	0.20%		0.28%
45	0.26%		0.51%
50	0.49%		0.81%
55	0.89%		1.13%
60	1.41%		1.44%
Ref	9	x 1	8 x 1

Number of active members: The number of active members was assumed to remain constant.

The mortality table used to measure pre and post-retirement mortality was the 1983 Group Annuity Mortality Table. This assumption was first used for the September 30, 1998 supplemental actuarial valuation. Rates were set forward 5 years for disabled retirees.

Mortality rates are used to measure the probabilities of members dying before retirement and the probabilities of each pension payment being made after retirement.

Sample Attained Ages	Single Life Retirement Values			
	Present Value of \$1 Monthly for Life		Future Life Expectancy (years)	
	Men	Women	Men	Women
45	\$138.18	\$144.67	33.74	39.69

MISCELLANEOUS AND TECHNICAL ASSUMPTIONS

SEPTEMBER 30, 2007

Marriage Assumption:	100% of males and 100% of females are assumed to be married. Male spouses are assumed to be three years older than female spouses.
Pay Increase Timing:	Beginning of (Fiscal) year.
Decrement Timing:	Decrements are assumed to occur mid-year.
Eligibility Testing:	Eligibility for benefits is determined based upon the age nearest birthday and the exact fractional service on the date the decrement is assumed to occur.
Decrement Relativity:	Decrement rates are used directly from the experience study, without adjustment for multiple decrement table effects.
Decrement Operation:	Disability and mortality decrements do not operate during the first 5 years of service. Disability and turnover do not operate during retirement eligibility.
Normal Form of Benefit:	The assumed normal form of benefit is the straight life form.
Adjustments:	<p>Age and service benefits were increased by the following to account for lump sum redemptions of unused sick leave and vacation time: County Plans 1, 3 and 5, 5%. County Plan 2, 2%. Airport Plans 1 and 3, 5%, Airport Plans 2 and 5, 2%.</p> <p>Age and service benefits were increased by 1% for Plans 1, 2, 3, and 5 to account for missing or incomplete data.</p> <p>Retiree liabilities were increased by 2% to account for the plan's pop-up provision. Straight Life amounts are not provided for members who elect the pop-up provision.</p> <p>A reserve equal to 2% of total active accrued liability was included to account for refunds due.</p>
Incidence of Contributions:	Contributions are assumed to be received continuously throughout the year based upon the computed percent of payroll shown in this report, and the actual payroll payable at the time contributions are made.
Benefit Service:	Exact fractional service is used to determine the amount of benefit payable.
Option Factors:	Option factors are based upon 7.0% interest and the 1971 Group Annuity Mortality Table projected to 1984, set back six years for females with an 85% Unisex Blend.

SECTION D

FINANCIAL REPORTING

This information is presented in draft form for review by the System's auditor. Please let us know if there are any items that the auditor changes so that we may maintain consistency with the System's financial statements.

Plan Description. The Wayne County Employees' Retirement System is a defined benefit and defined contribution pension plan that covers the employees of Wayne County.

The plan provides retirement, disability, and death benefits to plan members and their beneficiaries.

Contributions. Plan members' contributions are in accordance with Section B.

The employer's funding policy provides for periodic employer contributions based upon a *fundamental financial objective of having rates of contribution which remain relatively level from generation to generation of Wayne County citizens.* To determine the employer contribution rates and to assess the extent to which the fundamental financial objective is being achieved, the System has actuarial valuations prepared annually. In preparing those valuations, the individual entry age normal actuarial cost method is used to determine normal cost and actuarial accrued liabilities.

On the basis of the September 30, 2007 actuarial valuation, the employer contributions were determined to be as follows:

Contributions for	% of Payroll 20-year Amortization	
	County General Fund	County Airport
Normal Cost	9.93 %	6.40 %
Unfunded Accrued Liabilities	13.74 %	7.08 %
Total Employer DB Plan Contributions	23.67 %	13.48 %

@ Includes Hybrid Plan 5 after 2003.

& Transfers from DC Plan 4 to DB Plan 5 in 2004 resulted in larger contributions than anticipated. The amount of transfer activity, if any, could not have been known in advance.

+ Actual contributions are based on a percent of current payroll.

SUMMARY OF ACTUARIAL METHODS AND ASSUMPTIONS

The information presented in the required supplementary schedules was determined as part of the actuarial valuations at the dates indicated. Additional information as of the latest actuarial valuation follows:

Valuation date	September 30, 2007
Actuarial cost method	Entry Age Normal
Amortization method	Level percent-of-payroll
Remaining amortization period	20 years – open
Asset valuation method	4-year smoothed market
Actuarial assumptions:	
Investment rate of return*	8.0%
Projected salary increases*	4.0% - 8.4%
Cost-of-living adjustments	N/A

* Includes wage inflation at 4.0%

October 22, 2008

Mr. Ronald Yee
Director
Wayne County Employees'
Retirement System
28 W. Adams, Suite 1900
Detroit, Michigan 48226

Dear Ron:

Enclosed are 45 copies of the September 30, 2007 Actuarial Valuation report for the Wayne County Employees' Retirement System.

Sincerely,

A handwritten signature in cursive script that reads "Judith A. Kermans". The signature is written in black ink and is positioned above the printed name.

Judith A. Kermans
